

Technical Datasheet RS1

Hand Operated Series 75

Steel Roller Shutters

Notes:

- The hand-operated Series 75 Roller Shutter curtain is fabricated using 0.8mm thick steel and is limited to a maximum opening size of 2200h x 2400w.
- The hand-operated Shutter can be installed 'behind-fix' or 'between-fix' as shown. When installed between walls, 100mm wide jambs are required. These can be supplied by Airport Doors as an optional extra.
- Two shoot-bolts are fitted to the shutter to enable provision for locking. Shoot-bolts are fitted to each end of the bottom rail, either internally as standard or externally. Padlocks not included.
- Airport doors advises the client that provision of adequate fixing surfaces, of adequate structural strength to support the roller shutter (in accordance with BCA 2011) is not the responsibility of the door installer or the company.
